Here are some benefits with making friends in the game: Mercenaries. Some players have really strong mercenaries that will help you to a big problem. All that matters in the Dungeon Challenge is to kill as many enemies as you can. Black Knight of Delusion (128) is also fine once it reaches 127. The moment you unlocked the Level 3 skills at Level 70, you can start creating a farmer wizard and/or HalbermeD. Take note that you should not immediately put the full LUK stats. Since your teams and stats points are basically shit right now. For Luk Mages, I recommend putting 200 int before maximizing Luk and 200 STR first for Luk farmers before maximizing Luk. Luk Mages are good at cultivating low-level peatlands while Luk Halbers are excellent against high-level monsters. 179-181 will be very slow, especially if you're not strong enough or don't have a good party. You should be close to level 75 at this point, which will increase your effectiveness. Home Forums> Online Toram Game> Online Toram Game Guides> Before any of you complain on another instead, I posted the same on the unofficial forum of Toram Online. You can continue with Cerberus Ultimate (137) until you reach 144, but after that, you will switch to Super Death Mushroom (150) or Odolon Machina (146) Imitator Ultimate (146) Super Death Mushroom (150) Odolon Machina (146) From level 150 onwards, the routine will be much more tedious and boring. Eliminator Ultimate Ultimate (146) can be done until it reaches Level 154. If you can use level 4 skills, your next goal will be to continue the main search and reach El Scaro and unlock the side search called "Drunk Error." My forum name is Amaymon. 6.10.2020: Now that I think about it, this should be titled "General Leveling Guide" or something like that instead of some other leveling method. In order to make use of this method, you need to have your new character to start the main mission from the beginning. PART 1: For people who already have Level 3 or Level 4 skills, you can go straight to Nisel Mountain A2 to grind a little bit in order to get a little more skill points straight from the bat*. There is no need to go straight to Nisel Mountain A2 to Nis. the Mountain A2 as a beginner, as you will naturally go there within an hour after starting the main mission and youâ have skill points for the construction that you intend to continue in the future. In case you haven't reached level 75, you could just go back to Minotaur (check the difficulty level) or do Challenge Dungeon and other minor bosses that would help you get more EXP. Since this part is really tricky if you're just rushing the game from scratch and don't have a decent team and skills high level, you can just skip this part. Drunk error requires you to kill Metal Stingers (level 82). I've also played around without slot (NS) and 2 slots (2S) computer and the obvious thing is, it doesn't really matter if you don't use any slot weapon as long as your attack, refine, and stats are good. (Diary) Emblem of side missions. 3. Do not make any search of history other than the one declared the quickest way. At this point, everything will be entirely. If you're not careful enough, die since you're very frigid. Now we can start the real thing. Part 2: The Grindfrom Here, this guAoa will again be divided into two parts. Aim to get the spine reward. If you're a tank, you're improving the nightmare tank and the main mode bosses. The half-conjured game will no longer cut it, and you will have to watch how 3 enemies attack. Our last goal in the main search will be: Defeat the Venena Coenubia inside the Utimeime Palace: Throne Romsence You defeat Venena Coenubia, you have already finished the First part of this guinea. After getting a better team, continue your main search to reach level 150. First, it is created primarily for players who can already use Level 4 skills if you want to use the main misiA 3 and grinding to get out of the hard level range at high levels.
